## Important Health Warning About Playing Video Games

### Photosensitive seizures

A very small percentage of people may experience a seizure when exposed to certain visual images, including flashing lights or patterns that may appear in video games. Even people who have no history of seizures or epilepsy may have an undiagnosed condition that can cause these “photosensitive epileptic seizures” while watching video games.

These seizures may have a variety of symptoms, including lightheadedness, altered vision, eye or face twitching, jerking or shaking of arms or legs, disorientation, confusion, or momentary loss of awareness. Seizures may also cause loss of consciousness or convulsions that can lead to injury from falling down or striking nearby objects.

Immediately stop playing and consult a doctor if you experience any of these symptoms. Parents should watch for or ask their children about the above symptoms—children and teenagers are more likely than adults to experience these seizures. The risk of photosensitive epileptic seizures may be reduced by taking the following precautions: Sit farther from the screen; use a smaller screen; play in a well-lit room; do not play when you are drowsy or fatigued.

If you or any of your relatives have a history of seizures or epilepsy, consult a doctor before playing.

## ESRB Game Ratings

The Entertainment Software Rating Board (ESRB) ratings are designed to provide consumers, especially parents, with concise, impartial guidance about the age-appropriateness and content of computer and video games. This information can help consumers make informed purchase decisions about which games they deem suitable for their children and families.

ESRB ratings have two equal parts:

- **Rating Symbols** suggest age appropriateness for the game. These symbols appear on the front of virtually every game box available for retail sale or rental in the United States and Canada.
- **Content Descriptors** indicate elements in a game that may have triggered a particular rating and/or may be of interest or concern. The descriptors appear on the back of the box next to the rating symbol.

For more information, visit [www.ESRB.org](http://www.ESRB.org)

- Avoid excessive play. Parents should monitor their children for appropriate play.
- Take a 10 to 15 minute break every hour, even if you don't think you need it.
- If your hands, wrists, arms, feet, legs, or eyes become tired or sore while playing or if you feel symptoms such as tingling, numbness, burning or stiffness, stop and rest for several hours before playing again.

#### Basic Notes:

1. Hold the Fret Button that corresponds to the note on the screen.
2. Strum on the Strum Bar UP or DOWN to play the note.

#### Long Notes (otherwise known as sustains):

1. Hold the correct Fret Button down.
2. Strum on the Strum Bar UP or DOWN to play the note.
3. Hold the Fret Button down until the whole note has played.

#### Chords:

1. Chords are two or more notes played at the same time. These can come in the form of Basic Notes and Long Notes.

#### Touch Strip:

1. Tap the Touch Strip while pressing the Fret Buttons to simulate strumming.
2. Slide your finger on the Touch Strip during Long Notes to alter the sound of the note.
3. When you see clear notes, you can play them by touching the Touch Strip without pressing the Fret Buttons.

\*\*Note that when using guitar controllers without the Slider features, hit the Slider Notes using the Fret Buttons.

#### Open Notes (only for Bass):

1. Strum without pressing any Fret Buttons. Open Notes are displayed as a purple bar on the screen.

#### The Whammy Bar:

1. Press the Whammy Bar in and out on Long Notes to add your own style to each song.

### DRUM KIT CONTROLLER:

Hit the correct drum pads in sync to the notes that are on the screen.

#### Basic Notes:

1. Hit the drum pad that corresponds to the note on the screen.

#### Kick Drum Notes:

1. Use the kick pedal to hit the wide purple notes on the screen.

### MICROPHONE:

Use the microphone to sing along to your favorite songs across 5 different difficulties.

1. Sing the words that appear on the screen and get judged based on pitch and timing.

\*\*Note that the Xbox 360 controller needs to be connected to navigate menus when using the microphone.

### THE ROCK METER

The Rock Meter is the ultimate gauge for how you are doing. It will show you your points, note streak, and how much Star Power you have.

### The Multiplier Meter

If you can nail a series of notes perfectly, then you'll receive a handy "Score Multiplier" which is 2-4X the value of each note you hit. In band play, the band multiplier will increase as more band members are in Star Power together. In single player and band play, the multiplier will increase as you are in Star Power. Mess up and your score multiplier vanishes.

### Difficulty Settings

**Beginner:** The player only needs to hit the lines that come down the note highway on time. For vocals, just sing the words on time.

**Easy:** Get your feet wet with this difficulty. This difficulty setting only utilizes some of the playing techniques.

**Medium:** This difficulty setting brings notes a little faster and introduces new playing techniques.

**Hard:** Notes come down faster and advanced skills are needed if you expect to rule in this difficulty setting.

**Expert:** This insane difficulty will have you frantically using all the techniques you've learned.

**Expert+:** This difficulty is for the true masters of double bass drumming. When a guitar pick with two drum sticks appears to the left of a song, that means it features double bass drumming.

## Song Results Screen

**Grade:** This scale goes from 3 to 5 stars. Hit every single note to get gold stars.

**Score:** This is the overall score you received on your song.

**Note Streak:** Find out how long you went without making a mistake and missing a note.

**Notes Hit:** This tells you the percentage of notes you hit in the song.

(If that wasn't enough data for you...there are even more stats available by selecting the "More Stats" option)

## How Do I Get Star Power?

- Gain Star Power by nailing a series of star-shaped notes that glow. You have to nail the entire sequence, otherwise you're out of luck. You can gain even more Star Power by using the Whammy Bar or Touch Strip on long Star Power notes. Once your Star Power Meter is at least half-full, it'll flash, and you're ready to unleash Star Power. For vocals, gain Star Power by scoring well on freeform sections, achieving 'solid' on phrases, or get even more Star Power with 'excellent' phrases.
- **Guitar Controller:** Tilt the Guitar Hero guitar controller or press the Star Power Button to activate Star Power
- **Drum Kit Controller:** Hit Yellow and Orange Cymbal Pads simultaneously to activate Star Power
- **Microphone:** Tap the top of the microphone or press any of the following buttons: X,Y,B,A on the Xbox 360 controller to activate Star Power.

## Guitar Battle Rules

Hit each series of Battle Gems to collect attacks. Once you have collected an attack, tilt your guitar controller or press the Star Power button to attack your foe. You have to make them fail before the end of the song, but be careful, they can battle back!

## Guitar Battle Attacks

**Broken String:** Use this attack to break one of your opponent's strings. The button on the guitar controller won't work until they fix it by rapidly tapping that button until it is repaired.

**Difficulty Up:** This attack will increase the difficulty on your opponent's note chart.

**Amp Overload:** This attack causes the scrolling fret board on your opponent's screen to shake and flash, making it extremely difficult to read which notes are approaching.

**Whammy Attack:** Use this attack to cause your opponent to miss notes on their guitar. Your opponent must move the Whammy Bar fast to be able to play notes again.

**Power-Up Steal:** This attack steals your opponent's attack before they can use it. If they don't have one to steal and you activate this power, you'll lose it.

**Double Notes:** Deploying this attack forces your opponent to double up on how many notes they have to play.

**The Lefty/Righty Flip:** The Lefty/Righty Flip attack swaps the note chart around opposite to how your opponent would normally play the game.

**Mines:** The notes on the opponent's notetrack get populated with grey transparent gems that explode and lower the player's rock meter if they are hit.

**Blackout:** Use this attack to black out your opponent's notetrack briefly.
