

U.S. Medical Plan Travel

June 2022

Creating a safe and inclusive environment for all is a top priority for ABK and includes supporting the physical and mental well-being of everyone who works here, including their dependents. Current news and events have different impacts on the lives of many around the world often causing hurt, anger, confusion, and worry – and are deeply personal. We remain committed to providing fair and equitable health care. To that end, in addition to our enhanced mental health benefits, we have expanded our U.S. medical travel benefits.

Specifically, our medical travel benefits now will include travel expense coverage for U.S. employees and their dependents who participate in our medical plans and live in areas where access to medical care (including reproductive health, gender-affirming treatment, transplant care, and any other medically necessary procedures or treatments) is restricted or unavailable, or within 100 miles of where they live.

Your privacy is important to us and we want employees to feel safe and secure when seeking help. To ensure confidentiality, employees will access this expanded benefit through their medical insurance plan and be guided through coverage by their carrier. If there are general questions, or if you are an employee, please visit the HR Knowledge Base for additional information, or contact benefits@activisionblizzard.com.
